PROJECTS

- Write Node

 - Developed a full-stack personal blogging web application, "WriteNode," leveraging React and Tailwind CSS for a dynamic and visually appealing user interface.
 - Firebase was integrated to provide robust authentication and secure data storage, enabling users to create, edit, and publish blog posts.
- Smart Stream

 - Developed a dynamic movie website using React and Tailwind CSS for engaging user experience.
 - Used Movie Database API to fetch and display popular, trending, and upcoming movies.
- Blogging Mastery

 - Designed and developed a fully responsive frontend website “Blogging Mastery” for blogging tips and tricks.
 - Used HTML5 and Bootstrap5 with SASS compiler for customizations.

EXPERIENCE

- Frontend Developer (Remote)

Aug 2023 – Oct 2024
- Intern Digital Age - Lahore

 - Developed responsive web pages using **HTML5** and **Tailwind CSS**, ensuring cross-browser compatibility.
 - Created dynamic and interactive user interfaces using **JavaScript** and **React.js**.
 - Collaborated with the design and backend teams to integrate APIs and optimize user experiences.
 - Used version control systems like **Git** to track changes and collaborate with team members effectively.
 - Tested UI components across various devices and resolutions to ensure responsive design.
 - Researched and integrated third-party libraries to add additional functionality to web applications.
